CB2502
Window - Kit Double Hung

## Window and Door Kits

Chrysnbon Window and Door Kits offer authentic designs with exceptional wood-grained detail. They are molded in white, high-impact polystyrene to eliminate tedious sanding and painting. All kits are easy to assemble and install, with illustrated instructions and all of the necessary hardware.

## Working Window Kits with all the extras

These single, double-hung windows are sized to fit the standard $3 / 8^{\prime \prime}$ wall with $2 \frac{1}{2}$ " $\times 4^{15 / 6 " ~ o p e n i n g . ~ T h e y ~ o f f e r ~}$ working trouble-free sashes and include all of the "extras":

- Brass plated handle pulls
- Brass plated "lock"
- Clear glazing (removable for cleaning and painting)
- Interior and exterior casing

## Door Kits with no extras to buy

All door kits are sized to fit the standard $3 / 8^{\prime \prime}$ wall with $3^{\prime \prime} \times 613 / 16^{\prime \prime}$ opening. They can be hinged to swing in or out, from left or right, and are easily modified to use as interior doors. Kit includes:

- Real brass hinges - Brass plated door knobs
- Brass plated escutcheon plates
- Clear glazing (in "window style" doors)
- Interior and exterior casings

No-sew Cushion Kits
for Chrysnbon Rocker \& Footstool and Duxbury Chairs
Just cut and glue - no sewing!
Matches Chrysnbon skirted tables.
Kit includes patterns, foam, instructions and material to make cushions.

P6637
Thonet Bentwood Chair 1859 (1796-1871) this chair shows off his technique of softening wood with steam and molding it for chair components. The curvaceous but open and uncluttered look to this chair is prescient of 20th century modernism. It is often referred to as the "bistro chair" and is one of the most popular chair designs of all time.

## "Old Sparky"

 Electric ChairThe electric chair was devised as a more humane system of execution to replace hanging. It was developed by two employees of Thomas Edison, first used in 1890, and used by more than 25 states throughout the 20th century. Nicknames for "the chair" include "Old Sparky", "Sizzlin’ Sally", "Old Smokey", and "Gruesome Gertie".

## P6060

## Sgabello Chair/Italy 1489

Sgabello is an Italian term for a specific type of backstool typical of the Italian Renaissance. They generally have an octagonal seat with a long back splat which was often carved with a family's imprese or emblem drawn from its coat-of-arms. They would often be placed in hallways; their primary purpose was not lounging comfort.

## Sutherland Drop Leaf Table Mahogany

The Sutherland table was named for Harriet, Duchess of Sutherland (1806-1868) Queen Victoria's Mistress of the Robes. It is a type of gate-leg table characterized by a narrow center that when folded can be stored against a wall without taking up much space. This one has twin carved baluster uprights on cabriole feet connected by stretchers.

## The Resolute Desk

The Resolute desk is a large, nineteenth-century partners' desk often chosen by presidents of the United States for use in the White House as the Oval Office desk. It was a gift from Queen Victoria to President Rutherford B. Hayes in 1880 and was built from the timbers of the British arctic exploration ship Resolute. Franklin Roosevelt had a small door built for the gap to prevent people from seeing his wheelchair. Many presidents since Hayes have used the desk at various locations in the White House, but it was Jackie Kennedy who first brought the desk into the Oval Office in 1961 for President John F. Kennedy.

## Tiny Details 1:24 Scale Books

## Books

All Tiny Details books Are 0.4 " Tall by 0.3 " wide.
The books are perfect $\mathbf{1 / 2 4}$-scale miniatures and fit in most dollhouse miniature
bookcases. They all include real printed pages throughout, a thick cover and a
colorful dust jacket to protect the cover.

Tapewire Instruction Book

## HOW TO LIGHT GUIDE BOOK

A most useful guide book for the beginning miniature electrician.
In simple, straight-forward language this booklet describes the different types of wiring available and methods of installation. A useful primer before any lighting decisions are made.

CK1015-1
How To Light Guide Book

## COLONIAL DOLLHOUSE CONSTRUCTION

How was a dollhouse constructed in the days of yesteryear, long before miniatures were a viable hobby? This reprint of a 1937 article will pique the interest of anyone curious about dollhouse building in the "good old days".
A real keepsake!
6 page foldout brochure.
CK1015-3
Colonial Dollhouse Construction Circa 1937

CK0005
Cir-Kit Electrical Certificate

## TAPEWIRE INSTRUCTION BOOK

The clearest and most concise book on tape wiring yet written. Contains everything from a master layout drawing to instructions on the installation of all electrical components. Includes detailed "how to" illustrations on connecting wires to a plug, folding corners, wiring through hinges and "double bradding". Gives many shortcuts and money saving ideas.

CK1015-2
Round Wire Instruction Book

## ROUND WIRE INSTRUCTION BOOK

This handbook is the most comprehensive and detailed manual on round wiring ever published. It explains, in easy to understand language, an entirely new concept in round wiring of a dollhouse. Illustrations abound depicting the wiring installation process, step-by-step.
A remarkable new technique also reveals, for the first time, how any lighting fixture may be removed and replaced in the event of lamp failure. The instructions cover both open back and open front type dollhouses. Also explained are the two methods of wiring; surface wiring for the finished or antique type dollhouse and the groove method for dollhouses under construction.

## Electrical Videos

## LIGHTING THE WAY WITH CIR-KIT CONCEPTS'

In this video we introduce our new color-coded tapewire and describe how its use helps in making an error-free wiring system. Computer animation is used extensively as an aid to understanding basic wiring concepts and in the development of a house wiring diagram.
Filmed and produced by a professional film studio it reflects the high standards and dedication to excellence that have become a hallmark of the Cir-Kit Concept's name.
You'll see how a dollhouse is wired in stages and how easily such accessories as outlets, switches, sconces and chandeliers may be installed even after wallpapering for a completely finished look.
This is a must-see video for anyone wiring a dollhouse, even if you're a wiring pro. Let it be your first step towards creating a lighted masterpiece.

## Electrical Tools

## SOLDERING IRON

Our low-voltage soldering iron works with any 10 watt or larger 12 -volt Cir-Kit Concepts' transformer or 12 -volt car battery. Heats to solder melting temperature in 3 to 4

## SOLDER SPOOL

The $60 \%$ tin, $40 \%$ lead alloy composition assures a low-melting point and a strong metal-tometal contact.
Convenient dispenser pack.

CK1033-1
4ft. Solder Spool

## SWIVEL-HEAD FLASHLIGHT

There is perhaps nothing more frustrating than working inside an unlit dollhouse room. Whether it's during the construction process or when wiring it's no fun working in the dark. That's where our new swivel-head flashlight comes to the rescue. This unique device with its rotating head, small size, and bright, wide beam makes it the perfect answer for lighting even the smallest of dollhouse rooms. Simply place in room and point in any direction where illumination is required. Its compact size makes it easy to carry in either a pocket or purse. An attached clip on the back also makes
 it convenient to carry on a belt. Use this uniquely styled flashlight in your car, at the office or in your home; wherever a quick, bright light is required.
Measures $3 / 8^{\prime \prime}$ high by $15 / 8^{\prime \prime}$ wide by $3 / 4$ " deep. Requires two easily replaceable AA batteries, not included.

## WIRE STRIPPER

Use this handy wire stripper for stripping CK203-1 speaker type 24 gauge wire. Simply clip over wire, compress teeth and pull. Illustrated instructions included with each package.

CK1052<br>Wire Stripper

## AWL

This tool has been designed specifically for placement of teyelets. The awl is first used to make starter holes where eyelets are desired. The eyelet is then slipped over the awl insertion pin and pushed into place. It provides an extremely simple method of making

CK1044
Awl

CK1044-1
Awl Replacement Pins (4-Pack) electrical connections in hard to reach dollhouse locations.

A hollow compartment in the metal shank providesstorage for the four insertion pins. Overall length is approximately $5 / 8 "$. Instructions on package.

## BULB EXTRACTOR

CK1010-28
Replacement Bulb
For Flashlight

## Electrical Tools

## MINI DRILL

This drill has been specifically designed for the hobbyist who must work with all types of material. The overall length is a mere $41 / 2$ making it very maneuverable. The solid brass chuck is continuously adjustable and accepts all number size bits from 61 through 80 . No key is needed since chuck may be completely tightened by hand. Another feature is its hollow handle for storage of bits.

## BITS

A. CK1025-4 No. 55 Bit
B. CK1025-3 No. 66 Bit
C. CK1025-2
$1 / 32$ " Bit
D. CK1025

No. 70 Bit
E. CK1025-1

No. 75 Bit

These tiny bits are helpful aids for installing any of the wiring and lighting fixtures.

Their use greatly enhances and simplify installation in all types of wood.

The No. 55 bit is used in making starter holes for the CK801 eyelets and for the small hollow eyelets used at tape run interconnect points. Measures .052" in diameter.

The No. 66 wire-size bit is used principally for making the proper size hole for "fixture" and "circuit" type wires. Measures .033 " in diameter.

The $1 / 22^{\prime \prime}$ bit provides the proper size hole for wall sconce wires. This hole allows the pulling of sconce wires through a wall and electrically connecting them into a conductive tape run on the opposite side of a wall. (The wires are inserted into copper strip holes made with either a push pin or No. 70 bit.)

The No. 70 bit may be used in place of a push pin for making .028 " holes in copper tape runs. This size hole allows easy bradding of either a 12 -volt GOW or wire terminal bulb into a conductive tape run.
The No. 75 bit allows drilling of small .021 " holes at tape juncture points for easy insertion of $1 / 8$ " brads in hardwood or Masonite structures. (May also be used for outlet and switch nails.) The drilling of holes simplifies brad installation and assures a tight electrical fit between the brad and copper strip.
All bits may be used with either a $1 / 4$ " electric drill or the CK201 Mini Drill.

## PILOT HOLE PUNCH

The Pilot Hole Punch provides a convenient method of making starter holes for brass brads at all electrical interconnection points. The diameter of the punching tip is smaller than the smallest brad used, thus reducing the risk of punching excessively large holes in the copper foil tape runs. This

CK1014-1
Pilot Hole Punch (With 2 Needles)

CK1014-3
Pilot Hole Punch Needles (2 Pack)
nection.
The metal end may be removed for use in locations which might otherwise be awkward or hard to reach. The locking chuck provides an easy method of needle replacement in the event of breakage.

## JEWELER'S SCREWDRIVERS

This set of five nickel-plated jeweler's screwdrivers has been designed with heads that swivel and blades that are permanently affixed to a knurled handle. Shaft blades range from widths of .049 " to .079 " with overall lengths between $3^{\prime \prime}$ and $3^{3} / 8^{\prime \prime}$.

CK1050
Jewler's Screwdriver Set

## HAMMER

The CK1041 hammer, as shown, has been specially designed and manufactured for Cir-Kit Concepts to aid and simplify the brass brad and eyelet installation process. Its size and weight allow easy use in even the most remote corners of a dollhouse.

Only $5^{1 / 2 "}$ long, the hammer is made with a solid brass head and a deeply serrated steel handle for a positive grip.

## Ideal for a number of miniature

 building projects!CK1041
Brass Head Hammer

## PLIERS

Excellent for holding and inserting $1 / 8^{\prime \prime}$ brass brads in the various tape installation steps, these pliers have proven to be one of the most convenient tools available to the tape

## Electrical Tools

TEST PROBE

CK0204
Test Probe
The Test Probe can be used at any point along a conductive tape run for electrical testing or finding tape under wallpaper.

Simply push the needles into the copper strips and, if electricity is present, the enclosed bulb will light. The $.175^{\prime \prime}$ pin spacing makes this handy tool useable

Overall length approximately 2 ".

## STARTER WIRING KIT

The CK0101 contains everything needed to completely wire a 6-room dollhouse. The "wiring" consists of an easy to apply 2 -conductor tapewire with copper foils imbedded between layers of transparent tape. The illustrated instructions in each kit describe all the tasks necessary for completing an electrical installation.

A circuit-breaker protected 10 -watt transformer is included to provide power for up to 1612 -volt or 23 16-volt GOW bulbs.

## LARGE HOUSE WIRING KIT

CK0103 Large DollhouseWiring Kit CK9103
Lg. DollhouseWiring Kit U.K.

Our popular CK0103 kit has all the basic Starter Kit items plus a double quantity of tapewire, eyelets and brads. These added items will easily allow the wiring of a 10 to 12 - room dollhouse. A special circuit-breaker protected 20-watt transformer is included to provide power for up to 3312 -volt or 4616 -volt GOW bulbs.
An in-line power switch provides on/off light control without the need of disconnecting the lead-in wire from the dollhouse.

MH0655

## HW2203

Power Strip
With Switch
12 volt

## Transformers

Our plug-in transformers provide a safe and convenient AC power source for any dollhouse or miniature room. All Cir-Kit Concepts' transformers are designed to plug directly into a powered outlet, thus eliminating the need of building a special transformer enclosure within the dollhouse.

The most popular versions contain a built-in thermal circuit breaker making them virtually burn-out proof. In the event of an overload or short, the thermal breaker simply opens and removes voltage until the unit cools. After cooling, the breaker resets itself and automatically reapplies voltage to the output.

## U.S./Canadian Transformers

These transformers have straight blade pins and are designed primarily for the U.S., Canada, and Mexico, as well as certain other countries, such as Japan.

## Transformer Lead-In Wires

## TRANSFORMER LEAD-IN WIRES

## A. TRANSFORMER LEAD-IN WIRE

The CK1008 lead-in wire provides a transformer to dollhouse electrical interconnection and may be used with any screw-terminal type transformer. One end of the wire is equipped with a plug for connection to a Junction Splice on the dollhouse and the other with spade lugs for connection to the transformer output terminals. Overall length approximately 6 feet.

## B. TRANSFORMER LEAD-IN WIRE (with switch)

This lead-in wire may be used for those installations requiring the convenience of total dollhouse on/off power control. (Eliminates need for unplugging lead-in wire from dollhouse to disconnect power.) Same in all other respects as CK1008.

## C. TRANSFORMER LEAD-IN WIRE (with switch and spade lugs)

Use this lead-in wire in any application requiring spade lugs at both ends, i.e., transformers to terminal blocks. Contains an in-line switch and is identical in all other respects to CK1008-1.
D. TRANSFORMER LEAD-IN WIRE (with switch and fuseholder)

Same as CK1008-1 but with added in-line fuseholder. Can be used for protection of any transformer with screw terminals. The fuseholder is a threaded assembly and accepts all Cir-Kit fuses.

## Terminal Blocks/Junction Splices

## TERMINAL BLOCKS

A. CK1049

Two Pole Terminal Block
B. CK1049-1

Four Pole Terminal Block

Use these heavy-duty terminal blocks for interconnecting wires of all sizes. Electrical connection exists between opposite screw terminals and one or more wires may be attached to each screw terminal. The three different sizes have respective lengths of $1 \frac{1}{2}$ ", $2 \frac{114}{4}$ and $3^{\prime \prime}$.
C. $\begin{gathered}\text { CK1049-2 } \\ \text { Six Pole } \\ \text { Terminal Block }\end{gathered}$

## TERMINAL BLOCK JUMPERS

A convenient method of joining terminal block screws together. These jumpers eliminate the need for running wires between screws when fan-out of incoming wires is desired. Design allows easy installation and removal.

## SPADE LUGS

The CK1102 spade lugs may be attached to a wide range of 18-24 gauge wire sizes and used for connecting wires either to transformer or terminal block screws. Designed for both crimping and soldering to stripped wires.

CK1102
Flanged Spade Lugs Insulated - Pack/6

JUNCTION SPLICE EXTENDER

If you wish to install your Junction Splice in a less conspicuous location, such as under the dollhouse, use this extender for easy electrical access. Simply plug it into the Junction Splice and run the cord out for mating with the lead-in wire. The extender cord is $18^{\prime \prime}$ in length and is equipped with special, insulated wire sockets for
 connection to the lead wire plug. Instructions included.

CK1007-1
Junction Splice Extender

MH44006
Junction Splice Heavy Duty

## Adapter Cords

## ADAPTER CORDS

These cords have been developed primarily for those instances where running power by wire may be more convenient than running it with tape; for example, where two miniature rooms are to be electrically connected together and work from one transformer. Another use might be between the top floor of a dollhouse and a removable roof or attic section. Headless brass pins are supplied with the

CK1028-1
Miniature Adapter Cord With 1 Plug

CK1028
Miniature Adapter Cord
With 2 Plugs

CK1028-5
Bridging Cord For CK 1007's pounded into the tape runs to be joined. The plugs are then plugged into the pins to establish the interconnection.
The CK1028-5 Bridging Cord is used for interconnecting two tape mounted CK1007 Junction Splices (not included). Its use provides an extremely easy to install and low profile connection when completed.
The connecting cords are 18 " long and illustrated instructions are provided with each package.

## Splices

## THRU SPLICE

CK1006
Thru Splice

A specially cut splice for thru-wall and thrufloor applications. This splice provides a means of interconnecting tape runs on opposite sides of ceilings, floors or walls and eliminates the need for discrete wires, soldering or special interconnects. Simply drill two holes, push pigtails through and make brad connections to tape runs on each side of the partition.
Made of $5 / 8$ " wide tape, the overall splice length is approximately $2^{1} / 2$ " with the exposed pigtails measuring $1^{1} / 2$ ".

# Splice Extender 

## JUNCTION SPLICE EXTENDER

If you wish to install your Junction Splice in a less conspicuous location, such as under the dollhouse, use this extender for easy electrical access. Simply plug it into the Junction Splice and run the cord out for mating with the lead-in wire. The extender cord is $18^{\prime \prime}$ in length and is equipped with special, insulated wire sockets for connection to the lead wire plug. Instructions included.

MH44006
Junction Splice Heavy Duty

## Wire

## 32 GA., 2-CONDUCTOR WIRE

The size of our miniature two-conductor "zip" cord (.021" by .047 ") makes it one of the smallest two-conductor cords to be found anywhere. Each wire is a 32 gauge stranded conductor and its soft flexibility makes for easy handling and forming. Once started the wires may be separated by merely pulling them apart. Stripping is accomplished with the fingernails. Made with white plastic covering, 25 ' long.

## CK0203

32 Gauge 2-Conductor White Wire ( 25 ' shank)

## 32 GA., SINGLE-CONDUCTOR WIRE

These wires are used wherever single, extremely small size conductors are required. The wire is an amazingly small $.018^{\prime \prime}$ in diameter and may be easily stripped with the fingernails. The single conductor green wire is the same wire as that used on our Christmas light strings. Both styles are covered by a thin plastic insulation.

CK0203-2
32 Gauge 1-Conductor
White Wire
( 50 ' shank)

## 24 GA., 2-CONDUCTOR WIRE

Use this wire for those projects requiring heavier current capabilities. The "zip" type wires easily separate once started. Heavy enough for wiring an entire dollhouse if round wiring is desired. Similar to stereo speaker wire. 4A rating.

CK0203-1

## Tapewire

## TAPEWIRE

Double conductor tapewire is the "heart" of all Cir-Kit wiring systems. From its introduction in 1976 to the present it has been the predominant method of dollhouse wiring. Its use creates a printed circuit type layout and completely eliminates the congested wiring found in conventional systems. A super strong adhesive, exposed by the removal of a peel away paper carrier, ensures a secure grip on any surface.
Color coding of the copper foils greatly simplifies the making of corners during the wiring process. Brass brads are installed only at the blue-to-blue and copper-to-copper overlap points, eliminating any possibility of short circuits.
Another problem that occurs with other, lesser quality brands of tapewire is "bubbling". As time passes, the transparent overlay begins to buckle causing ripples that eventually show through the wallpaper or paint coverings. Using a special manufacturing process, Cir-Kit Concepts has completely eliminated this problem. A tape run made today will appear as straight and true in a year as the day it was laid. The Cir-Kit Concepts' name is also embossed on the natural copper foil to identify it as the one and only Cir-Kit Concepts' tapewire product.

The main body of the tape is $5 / 8^{\prime \prime}$ wide with a total thickness of approximately .005 ". The copper foils will carry up to 5 amperes of continuous current.

## Fuses

## FUSEHOLDER

The CK1026 in-line fuseholder is used in conjunction with the CK1024 series of fuses for system protection. Easily assembled, the fuseholder connects directly into the lead wire between the transformer and dollhouse.

Complete instructions are included with each package and no special tools are required.

Measures $21 / 4$ " long by $1 / 2 /{ }^{\prime \prime}$ in diameter.

## FUSES

These fuses provide the high-speed action necessary to protect both transformer and lighting fixtures in the event of a short. They may be used as additional safety devices for new or existing wiring installations. A blown fuse is easily determined by visual inspection.
Measure approximately $1 / 4$ " by $1 \frac{114}{4}$.

Two per package.

## Tools

## TEST PROBE

The Test Probe can be used at any point along a conductive tape run for electrical testing or finding tape under wallpaper.
Overall length approximately $2^{\prime \prime}$.

## Heat Shrink Tubes \& Fuses

## HEAT SHRINK TUBES

CK1033
Green Heat Shrink Tubes 12 Pack

CK1033-3
Clear Heat Shrink Tubes 12 Pack

These shrink tubes provide a means of connecting 32-gauge wires such as GOW bulb wires together without the use of solder. The shrink tube is simply slid over one of the wires to be joined, the bared wires twisted together, and the shrink tube slid back over the connection. Once in place a very small amount of heat may be used to shrink the tube and create a tight, insulated connection for the wires.
The inside diameter is $.040^{\prime \prime}$ or just slightly larger than the insulation on a GOW bulb wire. The wall thickness is approximately .002" (the thickness of transparent tape). The end result is an extremely small diameter splice once the tube has been heated, giving a very unobtrusive electrical connection. Measures approximately $1 / 2$ " long.

Use these larger heat shrink tubes for interconnecting heavier gauge wires. Each tube is black in color, measures approximately $1^{\prime \prime}$ in length and shrinks to $1 / 2$ the original size when heated.

## Lighting Adapters

## CHANDELIER ADAPTERS

CK0800
Ceiling Canopy
Brass Plated

Chandeliers can now be made removable using the ceiling plate that is part of most chandelier designs.
The secret of these adapters lies in the use of specially designed CK1023-6 spring-loaded eyelets. These eyelets firmly grasp the adapter and securely hold the chandelier to the ceiling. Capable of holding fixtures in excess of four ounces. Most chandeliers weigh in at less than an ounce.

Four different diameters allow usage with almost any existing size chandelier. The brass-plated finish and flush fit results in a matching and beautifully coordinated ceiling plate assembly.

## WIRE STRIPPER

Use this handy wire stripper for stripping CK203-1 speaker type 24 gauge wire. Simply clip over wire, compress teeth and pull. Illustrated instructions included with each package.

CK1052
Wire Stripper

## HOW TO LIGHT GUIDE BOOK

A most useful guide book for the beginning miniature electrician.
In simple, straight-forward language this booklet describes the different types of wiring available and methods of installation.

CK1015-1
How To Light Guide Book

## Switches

MINIATURE SLIDE SWITCH

CK1011
Miniature Slide Switch

The CK1011 is designed with a smooth sliding outer body to achieve the "on/off" operation. Why this departure from conventional logic? Smoothness of operation and low-profile appearance. CK1023-6 spring-loaded eyelets are provided to allow the easiest of installations. Simply install the eyelets and push in the switch. No pounding required.
The fully illustrated instructions included with each switch ensures a successful installation every time.
600 ma current rating.
Each package also contains $1 / 4$ " brass brads for use as marker pins when wallpapering.

SMALL SLIDE SWITCH

CK1048-1
Small Slide Switch

Our small SPDT slide switch is well suited for round wire systems involving soldered connections in imbedded locations. It may be located in a wall cutout for either room or complete dollhouse power control. Measures $5 / 8 "$ long by $3 / 1$ " wide by $3 / 8$ deep.

## IN-LINE SWITCH

CK1048
In-Line Switch

Use this switch wherever on/off power control is desired. It may be used on either 12 or 115 volt lines with zip type cords between 16 and 20 gauge. No soldering, only a screwdriver and wire cutter are required for assembly. To connect, disassemble the switch, cut a segment from one conductor, install wires in the switch, and reassemble. Sharp teeth inside the switch make the necessary electrical contacts.

## BRASS SWITCH PLATE COVER

CK1011A
Switch Plate Cover
Decorative Brass

Add a finishing touch to all your CK1011 switches. This distinctive brass plate simply snap fits over the switch to give it a rich and decorative appearance. The protruding toggle enhances the "on/off" operation and provides an added look of realism.

## Hardware

## SMALL HOLLOW EYELETS

These hollow eyelets provide an easy and convenient alternative to the "brass bradding" of tape runs. Their larger size and ease of handling greatly simplifies the electrical connection process. They may be used as a substitute for $1 / 8^{\prime \prime}$ brass brads in almost all applications. To install, first make a starter hole using either our No. 55 drill bit or the CK1044 Awl. Next, place the eyelet in the hole and push in for a quick and absolutely positive electrical connection.
Eyelets are brass and measure approximately $1 /{ }^{1 / 2}$ long with an inside diameter of .044 " and outside diameter of $.056^{\prime \prime}$. Packaged in quantities of 20 and 110 .
Instructions included in each package.

HW2205
Brass Grommets Pack/20

MH40185
Hollow Eyelets Small - Pack/20

## LARGE HOLLOW EYELETS

Most imported lamps come equipped with a larger but not to scale Hong Kong type plug. For those not wishing to discard this plug, our CK1023-2 eyelets provide a simple alternative. First, using the plug attached to the lamp as a guide, mark two holes on the tape run. Then, using either the CK1044 Awl or a No. 52 drill bit, make two starter holes and insert the eyelets. The lamp plug may now be directly inserted, making for an attractively flush and easy to install outlet.

CK1023-2
Large Hollow Eyelets Pack/20

Eyelets are brass and measure approximately $3 / 16^{\prime \prime}$ long with an inside diameter of .054 " and outside diameter of .071".
Packaged in quantities of 20 .
Instructions in package.

## SPRING-LOADED EYELETS

These eyelets are made especially for use with our CK801 and CK804 series of adapters. The internal springs grip the adapter pins and securely hold the chandelier or sconce firmly in place. Tests have shown them capable of holding fixtures in excess of four ounces. The eyelets are also used for mounting of the CK1011 switch.

CK1023-6
Spring Loaded Eyelets Pack/2

## WOOD SCREWS

These small threaded wood screws are designed primarily to hold a Junction

Splice in place but are also useful in any miniature project requiring small fasteners. The screws are approximately $7 / 16$ " long and $.060 "$ in diameter.

CK1045
\#0 Wood Screws
Approx 20

## HEADLESS PINS

These pins are an integral part of the Round Wiring and are used during the wiring process as electrical standoffs and connection points between wiring runs. They are also used with the Adapter Cords.

Pins are made of solid brass and measure approximately $1 / 2$ " in length by $.032^{\prime \prime}$ in diameter. Solder when used with tapewire for best electrical contact.

CK1031
Headless Pins Approx 36

## BRADS

Our $1 / 8$ " brads are some of the smallest in the world. When folded corners in a tape run are not desired these small, precisely made brads provide a very unobtrusive and effective means of establishing electrical connection. Their small size permits usage on even the thinnest of wood walls and nearly disappear from view when pounded into a conductive tape run. Measure approximately $1 / 8$ " by .024 ".

CK1022-1
1/4" Brass Brads
Approx 100

## Ceiling Globes

## CEILING SHADE KITS

These ceiling shade kits provide a means of creating an attractive lighting scheme at minimum cost. The installation may be accomplished within a matter of minutes and consists of simply bradding in the supplied 12 -volt bulb and placing the ceiling shade over the bulb. (The shade may be secured firmly in place to the ceiling with a small amount of fast-drying adhesive.) The entire installation may be made even after the room has been painted or wallpapered to achieve a maximum degree of realism.

## PIN-IN CEILING GLOBES

These are the easiest to install ceiling lights yet! Nails imbedded in the globes allow pounding of the fixture directly into a tape run with no additional wiring or electrical connections. Apply power and you have an instant working ceiling light.
The CK0841 globe is approx.. $1 / 2$ in diameter and the CK0842, $3 / 8$ ". Each contains a 12 -volt GOW bulb drawing approximately 60 ma .

## Ceiling Fixtures

## CEILING FIXTURE KIT

CK0500
Ceiling Fixture
"Porcelain Type"
(With wire terminal bulb)

The CK0500 provides a fast and economical method of direct installation at any number of key ceiling and wall locations throughout the house. Installation consists of making tape run holes with either a push pin or CK1025 bit, inserting the bulb wires into the copper ribbon holes, securing in place with $1 / 8$ " brass brads, and attaching the "porcelain" ceiling plate with epoxy or glue. (The entire installation may be accomplished after painting or wallpapering for optimum aesthetic appeal.) This item has been designed to present a very low profile appearance and consists of a "porcelain" ceiling plate, $1 / 8$ " brads, bulb and instructions.

## CEILING FIXTURE KIT

The CK0502 and CK0503 kits employ round pea bulbs to achieve a realistic incandescent bulb look. Bulb wires are pulled though a hole behind the fixture and attached to the tape run on the opposite side of the wall or on the floor above.

## CK0502

(With clear pea bulb)

## CANISTER LIGHT

Our new canister light provides a convenient and easy to install recessed light for any room. Excellent for all those areas requiring a flush and hidden light source. Simply drill a $7 / 32$ hole at the desired location, press the brass plated eyelet into place and connect the focused light bulb to a tape run above. Apply power and you have the perfect answer to all your indirect lighting needs.

Bulb measures .4 " long by .2 " in diameter and draws approximately 190 ma . Eyelet is .24 " long with a flange diameter of $.35^{\prime \prime}$. 2,500 hour bulb life.

## Spotlight \& Axial Bulbs

## SPOTLIGHT BULB

CK1010-10
12 Volt Swivel Spotlight Bulb With 12 " White Wires

This CK1010-10 Spotlight Bulb is a one of a kind bulb. Not only does it provide an extremely bright and focused beam of light, but also swivels in a $360^{\circ}$ arc and allows complete $180^{\circ}$ front-to-back movement. It may be pointed in any direction and at any angle to highlight a miniature work of art or provide a localized area of lighting. The large glass envelope makes possible a highly-focused lens and creates an extremely longlasting bulb; in excess of 5,000 hours

The bulb works on any 12 -volt system, measures approximate ly $7 / 8^{\prime \prime}$ in length by $3 / 8$ in diameter, and draws 180 ma of current. The bulb comes with attached 12 " white wires and may be snapped in and out of its holder for easy replacement. All metal parts are nickel plated.

1.5 Volt 1.0 mm Axial Bulb 50ma
CK1010-19A(25)
1.5 Volt . 75 mm Axial Bulb

15 ma
Sold by Pack/25 scale cars.

These 1.5 volt axial bulbs are a fraction the size of our popular micro bulbs and meet the challenge of even the smallest lighting projects. Ideal as light sources for both $1 / 4$ "and $1 / 2$ " scale miniatures.

Both size axial bulbs may be operated in parallel either from a 1.5 volt battery pack or from our CK1009G 1.5 volt transformer. The larger diameter CK1010-19 bulbs are electrically balanced and may be operated 12 in series across a 12 -volt transformer.
The bulbs may also be used in model railroading for locomotive number boards or classification lights as well as interior lighting for smaller

## CK1010-19

50 ma
CK1010-19A
1.5 Volt . 75 mm Axial Bulb 15 ma

## PEA BULBS

The pea bulbs look much like miniaturized versions of full-sized incandescent bulbs. By drilling a small hole for the wires, these bulbs can be pulled up tight against a ceiling or wall for use as is. Their appearance makes them perfect for closets, hallways or attics, and may be attached directly into a tape run.

Measure approximately $1 / 4 \mathrm{~m}$ in diameter and draw between $50-60 \mathrm{ma}$ at 12 volts.

## CK1010-09A

12 Volt Clear Pea Bulb
With 8" White Wires

## CK1010-09

12 Volt Frosted Pea Bulb
With 8 " White Wires

## Fluorette Fixtures \& Bulbs

## FLUORETTE BULBS

Ideal for back lighting or illuminating miniatures, these fluorescent shaped bulbs provide a unique and effective indirect lighting source. Available in either frosted or clear tubular glass. The frosted bulb gives a uniform and diffused light over a large area whereas the clear bulbs display a brighter and more localized illumination.
Fuse-type snap-in/snap-out construction allows easy bulb installation and replacement.
Each bulb measures approximately $1 / 4 /$ in diameter by $1 / 2 / 2$ in length. Power consumption for the CK1018-1 and - 2 bulbs is 70 to 80 ma when connected across a 12 -volt source. The extrabright Showcase Bulb draws approximately 220 ma of current. All fluorettes are warranted for 3,000 hours
when used with a Cir-Kit Concepts'12-volt transformer. Mate with CK1019 and CK1019-1 sockets. 2,500 hour bulb Life

## FLUORETTE SOCKETS

The clip-in type construction allows simple bulb installation and replacement.
The CK1019 is equipped with imbedded nails which automatically make electrical contact with a tape run when pounded in. The CK1019-1 has solder eyes for the connection and soldering of wires at each end.
Sockets measure approximately
 $3 / 16^{\prime \prime}$ wide by $15 / 8^{\prime \prime}$ long.

## Ultimate Flickering Fireplace Unit

The CK0871 Ultimate Flickering Fireplace Unit has been designed to provide the most realistic flickering fire effects available anywhere. Its features create a natural, true-to-life fireplace flicker and not the usual on/off operation. In other words, no more flashing, just a gentle realistic flicker to put warmth and glow into your fireplace and lights.
The unit comes with four bulbs; three flicker and one constant. Each flicker bulb is controlled by a separate electronic circuit, thus creating its own independent flash rate. The supplied bulbs can be installed either in the supplied coal insert or used separately in an existing fireplace.

- The included bulbs are oversize to provide the maximum possible light output and are attached with screws for easy removal and replacement; Not soldered in place.

## GOR \& GOW Lights

## GOW/GOR LIGHT BULBS

These high quality bulbs are excellent for illuminating any part of a dollhouse or miniature room. Bulb wires may be attached to our miniature plugs or directly bradded into tape runs with $1 / 8 \mathrm{l}$ brass brads.

The 12 -volt bulbs should be used in locations where bright illumination is necessary and the 16 -volt bulbs in areas where a soft, non-glaring light is preferred. The grain-of-rice (GOR) bulbs are ideal for those applications where minimum bulb size is desirable.

The grain-of-wheat (GOW) bulb measures approximately $1 / 8^{\prime \prime}$ in diameter and the GOR bulb approximately $3 / 3_{2}$ ". These bulbs are made with some of the smallest insulated wires available. Great attention has also been given to making the wire connections at the base of the bulb as unnoticeable as possible.

The CK1020 series of 1.5 volt bulbs may be used as is across a CK1009G transformer or as replacement bulbs for Christmas tree strings.

## WIRE TERMINAL GOR BULB

The CK1010-5 bulb is designed for special applications where regular GOW and GOR type bulbs may not be suitable. This bulb allows a practical and most cost effective means of providing light in a multitude of different applications. It may be used alone as a light source or covered with any number of shades for a made-to-order ceiling fixture.
This bulb is also a replacement for the CK500 series of ceiling light kits.

## Screw Base Bulbs \& Sockets

## SCREW-BASE BULBS AND SOCKETS

The CK1010-7 series is a widely used screw-in type bulb. In conjunction with a CK1010-8 socket they may be used in table lamps or in areas where easy bulb replacement is desirable. The small gauge wires from the CK1010-8 socket may be connected either to a CK1004 plug or brass bradded directly into a conductive tape run. Diameter of the glass envelope is approximately $1 / 4$ " with an overall bulb length of approximately $9 / 66^{\prime \prime}$.
The CK1010-7C bulb may be used either with a 9 -volt battery or as an extra-bright light source for 12 -volt electrical fixtures. The CK1010-7B bulb is a replacement bulb for the CK865 Glowing Embers. 2,500 hour bulb life.

The CK1010-29 bulbs are widely used in hanging chandeliers and wall sconces to achieve a lighted candle look.

## CURRENT RATINGS

## Micro-Bulbs \& Sockets

### 1.5V MICRO BULBS

Measuring less than $1.3 \mathrm{~mm}\left(.0555^{\prime \prime}\right)$ in diameter these bulbs are truly a tribute to the bulb maker's art. Perfect for small scale applications where a flashlight battery or 1.5 V power source such as the CK1009G transformer is available. They may also be used individually with a 12 -volt transformer if connected in series through a CK1100, 680 ohm dropping resistor. Draws less than 15 ma at 1.5 volts. 1,000 hour bulb life.

- Plastic windows
- Flower making.

Bonding ceramic or flexible tiles.

Superior to other tacky glues in that it dries clear and bonds plastics, varnish and paint.

and bonds

## 

Tacky Wax 9 回葛
DAD29 28g

Wax adhesive for holding miniatures in place whilst allowing re-positioning.
Many other uses eg. carrying small screws.

## Track Magic <br> DAC13 50ml <br> DAC26 250ml

## Track Magic Accessory Pack DAC18

Specially developed kit of 3 swabs with handles and 1 spare sponge for easy application of Track Magic. Apply Track Magic with pipette and apply to track. - Absorbs and holds fluids for easy application.

- Tear resistant.
- Suitable for Z, N, TT, OO, HO, O, G, N, EM and P4 railway gauges.
- Firm yet flexible handle.

Spare swab is ready for longer reach handle for use in tunnels etc.

Roket Card Glue

For fast assembly of card models eg. railway buildings and rockets.
Also bonds balsa wood, paper and card to most plastics.
Use sparingly, align and press parts together for instant bond. Water clean up.

Recommended by:

Scatter Grip $=9$ DAD25 150ml

Special adhesive which dries tacky allowing plenty of working time for bonding scatter materials. Ideal for railway layouts, gardens, dolls house scenery.

Scenic Spray Glue $=50$
DAD54 100ml

Ballast Magic Kit $E=5$

## View Glue

Backscene adhesive.
A special adhesive for
bonding model rail / diorama
backscene papers to
hardwood, hardboard, painted
surfaces, plaster, plastic
coated and plaster board.
It allows easy positioning and
adjustment.

## Decorator Glue

DAD26 112g

A paxit Formule
Decorator
Glue =in

Thick glue, which, like Tacky Glue dries clear overnight. It has instant stronger hold round corners and on vertical surfaces whilst also allowing repositioning. Bonds fabric, leather, silk, paper, wood, glass, plastic, metal, painted and varnished surfaces.
matrals
SCENICS

## Scenic Fibres

DBD28

0.5 metre pack. Scenic Fibres work with Making Waves to allow the easy and faster modelling of more realistic moving and white water eg. waterfalls, rivers. Forms a base onto which Making Waves can be brushed even down vertical surfaces in waterfalls.

## Making Waves DBD39 100 ml

For creating waves, ripples, waterfalls and moving water effects. Making Waves is a 1-part, clear setting, water based low odour resin that holds its shape, even on vertical surfaces. It may be used to:

- Make shallow water effects eg. streams, puddles.
- Texture Solid Water surfaces with ripples and waves.
- Texture Scenic Fibres for waterfalls.

## Modeling Accessories

## Pin Point Bottle Kit *

For precision gluing. A small soft dispensing bottle ideal for minute application of water based glues such as R/C Modellers Glue, PVA glue and fluxes.

Ideal for many tasks where fine finger controlled gluing action is needed. It is supplied with a variety of three plastic and metal tips that are easily cleaned with water after use.

## Pin Flow - Solvent Glue Dispenser

## Pin Point Glue Syringe Kit

## Brush Magic

Brush Magic is a powerful, non-flammable brush cleaner for the rapid cleaning of all types of wet or dried paints from brushes. Use to remove wet PVA from wood for perfect staining.

- Washes away with water
to a clean non-oily surface.
- Non-volatile \& low odour.
- Dissolves acrylic, enamel and cellulose paints.
- Dissolves epoxy \& polyester resins before they
are set.

Specially developed carbon fabric ( $10 \mathrm{~g} / \mathrm{m}^{2}$ ) for surfacing \& strengthening lightweight materials such as balsa, ply \& foam. It is rapidly bonded with thin glues such as Roket Hot, or laminating resins eg. Eze-Kote, Eze Dope \& Aeropoxy. It is not designed for tissue covering of models.
Uses include:

- Reinforcing undercarriage mounts.
- Wing joining.
- Servo trays.
- Propeller blades.
- Foam surfacing.

## Eze-Kote *

Laminating and finishing resin for balsa and foam models.
Eze-Kote is a 1-part water based, foam-safe, low odour resin alternative to epoxy. Brush onto balsa DBD62
 and light glass cloth to create a tough, ding and fuel resistant film that can be sanded easily and painted after $20-30 \mathrm{mins}$. Coverage: 75 ml covers approx See $\quad 1 \mathrm{~m}^{2} /$ coat.
pages 14-15

A specially formulated water soluble dope for shrinking, strengthening \& wind-proofing model tissue paper. It is non-flammable, has little odour and dries rapidly to a semi-matt fuel proof finish. Use to apply tissue decoration to all types of foam.

Aerokote Gloss
Aerokote Catalyst
Tough, high gloss, 2 pack, fuel resistant lacquer.

For brush or spray application.
Touch dry in 5-10 minutes for dust free finish. Of all the finishes you can apply Aerokote is the ultimate. Resistant to hot alcohol, gasoline or kerosene containing high nitro methane and mineral, castor, synthetic ester, or poly-glycol synthetic oils.

Tip: Always test on scrap material with the same surface before application. Ensure surfaces are clean, dry and that any paint is fully hardened especially when applying by brush. Best applied with an airbrush using a light dusting coat, allowed to dry ( $\min 4 h r s$ ) followed by further coats to build the required finish.

Foam Armour $x=3$
DBD50 250g

> - Creates a hard durable surface layer on foam and wood.

- Ideal for scenics, model aircraft etc. A thick water based resin that sets to produce an attractive, durable, scratch resistant coating on foam to prevent dings, wear and disintegration. It dries to a surface that can be
painted and glued easily and will reduce damage.
- Easy to apply.
- Seals surfaces, gaps and foam edges to prevent disintegration.
- Can be over-coated or mixed with acrylic paint.
- Is easily glued and worked.
- Bonds grass and scatter materials.

250 g pot covers $0.7 \mathrm{~m}^{2} / 7 \mathrm{ft}^{2}$

## Perfect Plastic Putty dBD44 40 ml

Fills fine gaps. Creates invisible seams. Water clean up.
Perfect Plastic Putty is a one-part, fast-drying, superfine filler with good adhesion and sanding properties on plastic. Easily used, even in awkward areas with water clean up. Apply with small spatula, smooth [Putiy and allow to dry.
Perfect Plastic Putty:

- Dries quickly without cracks to an ultra smooth finish.
- Fills deep cavities and takes paint easily. - Low odour.
- Ideal for texturing.

"The strength inside your model"

## FINISHING PRODUCTS

## Aeropoxy

300 g pack covers approx $2 \mathrm{~m}^{2}$ using $34 \mathrm{~g} / \mathrm{m}^{2}$ glass cloth

DBD01 300 g

Super-thin epoxy for wing skinning laminating and moulding. Use with lightweight glass cloth to add strength and toughness to models.

## WonderFill

DBD48 240ml

Laminating epoxy and

In kit form and sufficient quantity to join a set of wings.

## PowerModel 2T-S DLU01 500 ml

Full synthetic model gasoline 2 stroke oil.
High temperature protection. Accurate \& easy mixing.
A unique, full synthetic, high detergent 2 stroke oil. It works at all recommended ratios for 2 stroke gasoline air \& water-cooled engines used in model aircraft, cars \& boats. It can also be used in 4 stroke engines when the manufacturer See recommends a good quality 2 stroke oil.
page 19 For diesels too!
Offers:

- Safer running at high temperature.
- Maximum resistance to seizure \& wear in extreme conditions.
- Cleaner exhaust emissions.
- Outstanding piston \& cleanliness.
- Outstanding tickover stability and throttle response.
- Attractive odour.
- Protection while the engine is switched off.
- Outstanding fresh \& saltwater corrosion protection.

Suitable for : DA, OS, Evolution, DLE, Great Power Model Engines, Saito, Zenoah, MVVS, NGH, DLA, MOKI, PAW, ZDZ, 3W \& BME engines at manufacturers recommended ratios.

## Plastic Magic

New Plastic Magic is a low odour super thin cement for invisible joints..

$\checkmark$ Bonds: ABS, Styrene \& plastics other glues cannot. Boxed
Kit includes: 2 high precision long brushes.
Reaches every last drop.
Stable 40 ml non spill bottle.

The new safer formula can be applied with the Deluxe Materials Pin Flow solvent glue applicator(DAC11) or conventionally with a fine paint brush. Plastic Magic replacent brushes are also available(DAC25). Plastic Magic bonds nearly all commonly used modelling plastics including polyester, acrylic, styrene, ABS, PVC, butyrate and

## All Asphalt Shingles Available in All colors And All Styles

## ***** How to apply asphalt roofing *****

You will need:

- sharp scissors
- a tacky wood glue (or hot glue gun)
- a good eye for symmetry
1.) Lay the first row upside down flush along the bottom row of your roofing area.
2.) With the left side of your strip, and cut off any excess.
3.) Lay the second row parallel to it and translated up by about half an inch, to line up the top of the tab slot with thetop of the previous row.
The edge of the shingle strip should line up with the edge of the roof, but likely only for this row.
4.) Lay the third row staggered over to the left by about half a shingle, lined up the same way, with a small section of the strip overhanging the roof.
Cut this section off, trimmed to the roof edge.
5.) Lay the fourth row so that it is lined up with the second row's shingles as exactly as possible, and then the fifth row lined up with the third, and so on.

Optional: For a sturdier roof bond, use staples to secure the strip, on sections which will be covered by the next row.
6.) When nearing the roof peak, cut a strip to meet flush with the edge if necessary.

Make sure the opposite side of the roof is finished the same way before continuing.
7.) To cap the roof, cut off single squares, fold them evenly in half, and glue them overlapping the previous shingle by $1 /{ }^{1 / 4}$ along the roof peak.

Optional: For a neat, pressed look to your freshly glued shingles, lay a board on top and apply weight until the glue dries

## Ther Lovelia Rug Collection

## Exciting News!!

Aztec Imports has just come into the possession of a quantity of Heirloom dollhouse rugs that have been languishing in a warehouse on the east coast for 10 years. You may recall seeing these rugs in the market years ago. Lovelia Albright went to Europe to design these rugs with $5^{\text {th }}$ and $6^{\text {th }}$ generation Atiliers. Many were woven on 100 year old looms and most are $100 \%$ wool. Some are $100 \%$ cotton(the thin Gobelin style that were woven on old Jacquard looms used for tapestries). Some were woven in Belgium from synthetic fibre to get the detail exact. The line was called "The Lovelia Collection" and it was distributed by Dee's Delights, Gerald Shanin Company, and Foley and Robinson. We are able to offer them to you at THE SAME PRICE THAT THEY WERE TEN YEARS AGO.
We have from a few pieces to several hundred pieces of each style in stock.
Once these are gone they cannot be replaced.

Fine Miniature Accessories

## Window and Door Kits

Chrysnbon Window and Door Kits offer authentic designs with exceptional wood-grained detail. They are molded in white, high-impact polystyrene to eliminate tedious sanding and painting. All kits are easy to assemble and install, with illustrated instructions and all of the necessary hardware.

CB2501
Window - Kit
Double Hung
Working w/mullion

CB2502
Window - Kit
Double Hung
Working w/o mullion

## Working Window Kits with all the extras

These single, double-hung windows are sized to fit the standard $3 / 8$ " wall with $21 / 2 " \times 45 / 16^{\prime \prime}$ opening. They offer working trouble-free sashes and include all of the "extras":

- Brass plated handle pulls • Brass plated "lock"
- Clear glazing (removable for cleaning and painting)
- Interior and exterior casing

## Door Kits with no extras to buy

All door kits are sized to fit the standard $3 / 8^{\prime \prime}$ wall with $3^{\prime \prime} \times 6^{13 / 16 "}$ opening. They can be hinged to swing in or out, from left or right, and are easily modified to use as interior doors. Kit includes:

- Real brass hinges - Brass plated door knobs
- Brass plated escutcheon plates
- Clear glazing (in "window style" doors)
- Interior and exterior casings

## Ming Dinisty Writing Table Chair

Yokeback arm chair from the Ming dynasty, it was origionaly used as the chair for a Chinese painting desk. The design of this chair is simple The top of the chair fame is Cyma shaped, The back is a flat splat with moulded edges and a very small cut out were the splat fits on to the chair seat. (Hence the name yoke back) The top of the back frame and splat are curved back slightly. The chair has open arms curved outwards with straight supports.The seat frame is molded with a curved valance that forms part of the front framework. Shaped brace blocks have been incorporated on the front legs under the seat at the sides and at the front of the chair under the arm rests.

## Chinoises - Black

Rounded headboard comprisied of a centre panel and a smaller panel on either side. The headboard is decorated with a turned post on either end. The footboard is low. The bed is painted black with gold detailing around the panels and intricate floral and bird designs on the heaboard and footboard.
Manufactured by: JBM Miniatures

Early 17th century oak bed with hand carved panels. A reproduction of the origional Great Bed of Ware which in the 17th Century would have slept up to 8 people at a time and be handed down through generations of the family. The turned posts at the foot of the bed incorporate a small cage formed by a fine turned spindal at each corner. The current owners of the bed would display their family crest or figurine. The cage sits on a hand carved plynth which is the bottom of the bed post and the foot of the bed.
Available in a walnut finish.

Manufactured by: JBM Miniatures

## 15th Century Tudor

The sides of the coffer are panelled and the front is heavily carved with designs representing church windows. The hinged rectangular top of the coffer is decorated with carved wooden faux straps. The coffer can be used as a seat or table.
Available in a walnut finish.
Manufactured by: JBM Miniatures

## 16th Century Tudor

The most common piece of Tudor furniture is the wooden chest. It served as a seat and table in addition to providing dry storage space. This joined chest (joined refers to the method of construction) has carving of geometrical patterns in the panels and grooved stiles.
Available in a walnut finish
Manufactured by: JBM Miniatures

16c. Tudor - Walnut
 Sold by Each

Made during the Tudor dynasty in England 1558-1603. This miniature reproduction of the orillional bed has an elaborately carved wooden headpiece supported by a tall panelled bedhead and two turned posts on the foot board. Each panel in the headboard and footboard is decorated with a carved motif sometimes with the families coat of arms. Beds were designed for warmth and privacy and they were so valuable and highly prized that they were passed down the generations and the 14th century onward it is not unusual to find them mentioned in wills.

Available in a walnut finish.
Manufactured by: JBM Miniatures

## JJ05016WN

Side Cabinet
16c. Tudor - Walnut

Sold by Each

## 16th Century Tudor

Half an octagon in shape the top has concave moulding around all sides. The small panels have been decorated with roundel designed carvings. The bottom shelf is enclosed by the back panel of the cabinet. Available in a walnut finish.
Manufactured by: JBM Miniatures

## JJ40003WN

Aubrey Gothic - Walnut
 Sold by Each

## Gothic

Aubrey or Medieval alms cabinet originally a cabinet that was used to store leftover food for the poor. The two cabinet doors are carved in Gothic design. The panel at the back of the cabinet extends down to the pot board shelf and the floor. A turned column on either side supports the cabinet at the front. The side panels are carved with a similar design as on the cupboard doors and each panel is angled outward to meet the other panel. The top of the cabinet follows the same shape. Available in a walnut finish. Manufactured by: JBM Miniatures

## Gothic

Barber Chair
Walnut
1:12 Scale
Sold by Each

## Barber Chair

Barber chairs from the Civil War era share many features with modern chairs including high seating, upholstery, and a footrest. The first factory-manufactured chairs date to around 1850. The first one-piece reclining barber chair with an attached footrest was patented in 1878 by a company in Saint Louis. The chair has a lever on the side which on a working chair would be used to operate the height of the chair. It would also enable the chair to rotate or lean backwards (for hair washing and shaving). The seat, headrests and leg rests are upholstered in Black leather
Available in a walnut finish.
Manufactured by: JBM Miniatures

## Spanish Jacobean

The arm chair with open arms has a high back with straight carved finials The quadrangular legs that form the chair under frame are joined with a staight stetcher at the back of the chair. The front stetcher is decorated with an ornate pierced carving and the bottom floor level rail of the underfame extends to the front and back of the chair by 1/16 inch. The flat arm rests are supported by a fine turned spindal.The chair is upholstered in a green linen wich has gold flowers woven into the fabric.
Available in a walnut finish.
Manufactured by: JBM Miniatures

## Elizabethan

English 1850 During this period Engtish furniture, in the domestic setting, was a symbol of status and wealth; it was the decoration of the furniture that made furniture valuable. Turned baluster legs, square spreader bars, and recessed carvings on the sides and front are the only decorations on this simple table built to be sturdy and functional. The front panel opens down to create an enclosed storage space under the table top in place of an under the table shelf. The sides of the table fold down so that the table can be stored in a small space. Available in a walnut finish.

leather with studded trim. The carved legs are scrolled and the spreader bars hand carved.
Available in a walnut finish.
Manufactured by: JBM Miniatures

JJ06042WN
Round Table
Spanish/Low - Walnut
21/2"H x 4/2/2"W
Sold by Each

## Spanish Style

Spanish furniture was simple in design and construction it was much heavier than Italian or French and the ornamentation showed Moorish and Classical influence. This Round table top is square cut to poduce the heavier look associated with the funitue of this era. The four leg supports have been carved in the Spanish curvature and notching style forming a flat bracket at the top of each leg to support the table. The feet have been formed as a continuous part of the leg. The speader bars with the same curvatures as the legs have a notched joint at the centre were they cross.
Available in a walnut finish
Manufactured by: JBM Miniatures

## Spanish Style

The most characteristically Spanish furniture of the early periods in its history are cabinets, called "Sacristy" meaning a cabinet wich was used by the priests to strore their vestments and and any vessels used in their services.The hangings and altar linens a were also stored in these cabinets.The two door panels on this beautiful miniature repoduction are decorated with a relief carving of the king and Queen of Spain.The sides of the cabinet have been carved and the plynth decorated with the same carving as the two drawer fronts in the Friez. The door and drawer handles are faux iron rings. The top of the cabinet is decorated with a moulded cornice. A similar moulding with carved reeding has been used under the door section of the cabinet.The cabinet is supported on a banded lye shaped trestle ends supporting the table sit on ball and claw feet. A caved medallion joins the two cyma curves that form the lye shape and the faux metal iron brace acts as a spreader bar between the trestle ends. Available in a walnut finish.
Manufactured by: JBM Miniatures

## Spanish Style

Spanish furniture was much heavier than Italian or French and during the 17th Century trestle supports were used more than legs on benches and stools. Often they would have iron braces to strengthen the item and for decorative purposes. This exquisite table has a rectangular top with a hand carved banding abound all sides. The apron is decorated with a floral design carving and in each corner a small carved bracket has been incorporated under the table top. The tall banded lye shaped trestle ends supporting the table sit on ball and claw feet. A caved medallion joins the two cyma curves that form the lye shape and the faux metal iron brace acts as a spreader bar between the trestle ends. Available in a walnut finish.
Manufactured by: JBM Miniatures

## French 19th-20th century Louis XV Desk \& Side Chair

French 19th-20th century Louis XV bombe shaped
petit-bureau de dame (secretary) banded with a gilt rim. Six small drawers form the superstructure of the desk. A small gilt decorated (non-working) clock is centered above the drawers. The leather desk top is outlined with a gilt twisted ribbon and the desk is fitted with a frieze drawer, attributed to Francis Lois Linke (1855-1946). The pad feet and knees of the cabriole legs are decorated with a gilt leaf design and the front of the freeze drawer is similarly decorated with an extended carved leaf and bottom moulding.
5 "high x 51/4"wide x 21/4"deep. ( $124 \times 129 \times 61 m m$ )
Available in walnut with Gilt trim.
Manufactured by: JBM Miniatures

## Jacobean 1620

Following the style of a Farthingale chair, which had no arms, a low solid padded back; high-raised seat. The Chair can be used as a dining Chair or as a desk chair with matching desk JJ05038WN. Turned baluster legs at the front and plain ones at the rear. The front ones have been fluted which in that period would be call turning because of the method used to achieve the fluting. The top spreader bar at the front of the chair fits into the top bulbous turn of the legs and is carried around the sides of the chair. The turned spreader bars are copied and used just above floor level to reinforce front to back legs. The camel back of the chair and the seat are upholstered in a dark red leather, a fabric favoured on Jacobean furniture. The turnings on either side of the back are surmounted by finials.
Available in a walnut finish.
Manufactured by: JBM Miniatures

## 18th Century Davenport

The Davenport desk,namerd after Captain Davenport who ordered one from Gillow \& Co furniture makers in the 18th century. The desk has a brown leather lined sloping, lift up top. There are 5 small drawers on the right hand side of the pedestal support.The top of the desk has a small gallery for ink wells, pens and pencils. The gallery surround is serpentine shape with a centrally placed hand caved medallion in the back. The front legs are fluted and the desk apron is hand carved to match the medallion.
Available in a walnut finish.

Table
Spanish Refectory/16th c. - Walnut
$21 / 2^{\prime} \mathrm{H} \times 2^{1 / 2}{ }^{\prime} \mathrm{W} \times 6$ "D
Sold by Each

## Spanish Refectory

During the 16th century, Spanish design was a unique blend of Renaissance and Moorish design. In this table (or escritorio) we see how the two styles have been combined with a simple, square edged, plank table top and heavy carving on the table skirt and drawer fronts. Referred to as a long table, a term that supersedes the name refractory table which once applied to a table of this size but was changed C 1540 after the abolishment of the monasteries during the reformation, is supported on ring turned spindle legs with spreader bas just above floor level. The four drawer fronts are decorated with a leaf carving and have ring style drawer pulls. A similar carving has been repeated on the remaining thee sides of the table apron.
Available in a walnut finish.

## $1600 c$.

Carving was the main ornamentation of the Italian Renaissance furniture. Perfectly proportioned, exquisitely detailed, the legs on this cabinet are gunbarrel turned and the carved ornament consists mainly of faceted lozenge shapes. The back legs are plain rectangular characteristic even on extemely ornate pieces of furniture c1670.The idea that the description Court has royal connotations is almost certainly wrong the word court is French for short and refers to the low height of the cabinet. The spreader bar at the bottom and

## Victorian Antique Japanned <br> <br> Sewing Box

 <br> <br> Sewing Box}Victorian Antique Japanned Work Table Sewing Box.During this period large and ornate sewing boxes were fashionable. Needlework was a popular pastime for dowager ladies and sometimes even the gentlemen. This needlework box highly decorated in the chinoiserie style is supported on a tall tressel table with Lyre shaped ends. The sides are cut in balancing cyma curves.It sits on 2 scroll cut cymacurved bracket feet. The interior of the box has been divided into compartments of vaious sizes some with small lids that are fitted with a little brass knob so that they lift of to gain access to the needlework notions that are stored in the compartment. The lid of the box has been decorated with beautiful hand painted chinoiserie designs mostly they are in rounded sarcophagus shapes with very fine gold decoration depicting oriental scenes.

introduced in the late 17th century. This specialist chess table is a reproduction from George 1st era oval in shape with a chess board in the centre and room on either side of the board to place the chess pieces in play. A brass gallery around each end of the table prevents the chess pierces from falling of the table during play. A drawer at the front and back of the table was used to store chess pieces, dice and scoring pads.The drawer fronts are decorated with a rectangular raised cock bead around the 2 brass drawer knobs. A raised carving around the ends of the table under the gallery is decorated with a raised cock bead to match the decoration on the drawer fronts The 4 turned fluted legs are fitted with casters. A set of black and white hand made chess pieces are included with the table.
Available in a walnut finish.

## New Catalog Overflow

DLU03 Lubricant Eze Wind 50 ml
Each

Instructions: Fill with water and gently spray surface to be bonded. For best results with Ballast Magic apply 2 to 3 light coats of water, adjust, and allow to dry overnight. When spraying glue periodically clean spray head by purging with water or suitable solvent to help maintain fine spray pattern.

DAC23
Ballast SprayBottle
Applicator 100 ml
Sold by Each

Glass fibres for strengthening and thickening resins \& cyano (ca). Stir fibres into epoxy and polyester resins to thicken and improve their toughness, flexural strength, crack resistance and dimensional stability.
To use with cyano adhesives:
Use with thin penetrating ca
[eg. Roket Hot (DAD43)].
This will produce an extremely adhesive, hard \& tough material.

Caution: will cause heat.
Suggested uses:

- Strengthening filler for epoxy or polyester.
- Rapid repairs to thin composite sheet
using ca glue.
- Creating fillets.
- Reinforcing joints.
- Thickening epoxy.

## New Catalog Overflow

Roket UV
DAD88 DAD89
5 g - Each
20g-Each

## A UV (Ultra Violet)

 light activated adhesive.It is: - crystal clear

- odourless in use
- non-blooming
- fast curing 1-3 seconds.

Roket UV bonds almost all materials including glass, plastics, metal, wood $\&$ leather. It is not recommended for surfaces subject to water immersion, shock or shiny plastics.

DAD88 5g tube with UV light, DAD89 20g refill (adhesive only).
 all materials including

## Eze Epoxy

 DBD68 Putty Sold by Each For rapid customising of plastic, resin, wood \& metal models. This 2-part, fast-curing, epoxy putty will not shrink or crack. Sets in 10-15 minutes to a tough, lightweight plastic.- Pre measured for accurate $\varepsilon$ easy mixing of the
2 parts.
- Easy to sand, carve \& paint once set.
- Long life with
re-sealable foil bag.
- Easily rolled to thin
films.
- Holds its shape.

## Carbon Fibre DBD66 Mat $.25 \mathrm{~m}^{2}-75 \mathrm{~cm} \times 33 \mathrm{~cm}$ pack Sold by Each

Tease into place for contouring \& shapin Chopped carbon fibre for use with epoxy res such as Aeropoxy. Its non-woven structure enables laminating task where shaping \& conto ing are required especia in tight applications.

- Easy spread for contouring.
- Easily cut $\&$ thinned for lighter weight.
